

# Corrosion Resistant Polished Stainless Steel Tube For Demanding Industrial Applications

## **Basic Information**

- Place of Origin:
- Brand Name:
- Model Number:
- ShengQuan
- r: 201/304/304L/316/316L/321/309/310

China

## **Product Specification**

Temperature Resistance:	High
Strength:	High
Shape:	Tube
• Finish:	Polished
Width:	Or As Required
• Standard:	ASTM,JIS,AISI,EN,GB
• Technique:	Cold Rolled Hot Rolled
• Type:	Plate,Coil,stainless Steel Sheet
Highlight:	antiCorrosion polished stainless steel pipe tube , Industrial polished stainless steel tube, Corrosion Resistant polished stainless steel tube

### **Product Description:**

The Stainless Steel Cylinder Tube is designed to withstand high temperature and pressure, making it suitable for use in challenging applications. This Stainless Steel Cylinder Tube is available in various shapes, including tube, plate, and coil, providing versatility in its usage. The Stainless Steel Tube is customizable in length to meet the specific requirements of your application.

Our Stainless Steel Cylinder Tube is suitable for use in various industrial applications, including automotive, food processing, chemical processing, and more. The high-temperature resistance of the Stainless Steel Tube makes it ideal for use in high-temperature environments, ensuring optimal performance and longevity.

The Stainless Steel Cylinder Tube is a cost-effective solution that offers excellent value for money. It is easy to install and maintain, making it an excellent choice for various industrial applications. Our Stainless Steel Cylinder Tube is available in different sizes and shapes, making it easy to find the perfect fit for your specific application.

Overall, our Stainless Steel Cylinder Tube is a high-quality, durable, and versatile product that is ideal for various industrial applications. Whether you are looking for a Stainless Steel Hollow Tube or a Stainless Steel Cylinder Tube, our product is sure to meet your needs. Contact us today to learn more about our Stainless Steel Cylinder Tube and how it can benefit your industrial application.

#### Features:

Product Name: Stainless Steel Metal Tube Standard: ASTM,JIS,AISI,EN,GB Temperature Resistance: High Material: Stainless Steel Finish: Polished Strength: High Also known as: Stainless Steel Cylinder Tube, Stainless Steel Pipe, Stainless Steel Pipe

### **Technical Parameters:**

Туре	Tube
Standard	ASTM,JIS,AISI,EN,GB
Width	Or As Required
Corrosion Resistance	High
Shape	Tube
Length	Customizable
Finish	Polished
Temperature Resistance	High
Size	Customizable
Strength	High

#### **Applications:**

#### Construction

Stainless Steel Metal Pipe is commonly used in the construction industry for its strength and durability. It can be used in the construction of buildings, bridges, and other structures. The polished finish of our Stainless Steel Metal Tubing can also add an attractive look to the finished product.

Food and Beverage

Stainless Steel Metal Pipe is the preferred material for the food and beverage industry due to its hygienic properties and resistance to corrosion. Our Stainless Steel Hollow Tube is ideal for use in food processing and storage equipment, as well as in beverage dispensing systems.

#### Automotive

Stainless Steel Metal Tubing is commonly used in the automotive industry due to its high strength and resistance to corrosion. Our Stainless Steel Metal Pipe can be used in exhaust systems, suspension components, and other parts of the vehicle. Medical

Stainless Steel Hollow Tube is commonly used in the medical industry due to its hygienic properties and resistance to corrosion. Our Stainless Steel Metal Tubing is ideal for use in surgical instruments, medical implants, and other medical equipment. Petrochemical

Stainless Steel Metal Pipe is commonly used in the petrochemical industry due to its resistance to corrosion and high temperatures. Our Stainless Steel Hollow Tube can be used in the construction of pipelines, storage tanks, and other equipment. Aerospace

Stainless Steel Metal Tubing is commonly used in the aerospace industry due to its high strength and resistance to corrosion. Our Stainless Steel Metal Pipe can be used in the construction of aircraft components, such as landing gear and hydraulic systems.
